Abdulla M. Al Shirawi

Founding Chairman

Mohan G. Valrani

Founding Sr. Vice Chairman

From the very beginning, we embedded a sense of pragmatism in the culture of the Group. It is this pragmatism that has not only seen us succeed through the most difficult of times, but has also allowed us to achieve greater success during times of economic growth.

Our journey of transformation from a small trading house to an industrial complex, and then on to becoming a conglomerate comprising of trading, industrial, distribution, contracting and service industries, has seen its fair share of trials and tribulations. But we can honestly say that today our 10,000+ employees are richer in experience than their counterparts.

The foundations of the Group are rock solid. These foundations, as for all our companies, were cast in the United Arab Emirates, but today our companies look at the world as their marketplace. In this age of globalisation, we continue to grow at breathtaking speed.

Speed is a virtue that the Group stands by at all times. The successful induction of the next generation into the business has allowed the Group to retain the advantages of remaining a family concern, but at the same time has enabled us to act with speed when it comes to hiring top grade professionals.

The Group has been built on the premise of sheer hard work. We have progressed this far by believing in our values and never shying away from putting in the effort needed to grow a business. Our values – Excellence, Transparency, Compassion, Honesty, Empowerment and Discipline – are inculcated in every one of our employees.

For us, the journey has been a long one, but we see it as just the beginning of bigger things to come. Our next generation is now fully equipped to take the Group forward to unimaginable heights.

**Al Shirawi
Group**

Since **1971**

CHAIRMAN'S MESSAGE

Mohamed Al Shirawi

Chairman

For over 50 years, the Al Shirawi Group has focused on growth across our core businesses. Thanks to the foresight of the Rulers of the United Arab Emirates, our group has gone from strength to strength while redefining our core businesses along the way. While this has been an exciting journey, it has not always been an easy one.

I am often asked what the secret behind our success is, and I wish there were a recipe that I could distribute to my colleagues that would somehow bring together the lessons that I have picked up over the last +40 years in the group. When I do reflect on this journey, there are nevertheless three key themes that stand out in defining how we have managed to survive during turbulent periods and thrive during growth phases. These three themes are Unity, Hard Work and Innovation.

The unity of the shareholders of our group has been a result of the values that have been passed down by our founders. Their unity has been an example for the entire 2nd generation on the “power of one”. While our group culture promotes respectful discussions between shareholders, we are also aware that once we arrive at a decision, we all are committed to it wholeheartedly. We have been through numerous economic cycles, but yet we remain united on this core principle of the “power of one”.

However, unity means very little if it is not backed up by hard work. I can honestly say that I am fortunate to have a group of CEOs that work tirelessly in their mission to meet all stakeholders' expectations. This group is the perfect blend between experience and youth, operating in an ecosystem that allows for support across the group verticals. Our group philosophy promotes hard work with purpose, and this purpose comes from our 10,000+ strong employee base who are part of our extended family.

As we look into the future, the key to our continued growth will be innovation. Innovation has always been a bedrock of our ethos, but as we look forward into the future, it will be the essence of our survival. We must adopt technology like never before and steam ahead into a world where the jobs of the future are yet to be determined. Innovation is the only solution in what is becoming an increasingly complex and connected world.

MANAGING DIRECTOR'S MESSAGE

Navin Valrani

Group Managing Director

For as long as I can remember, my most impactful mentors have been our founders. I remember getting excited at every opportunity I received in seeing them work together to build a better future for the group. Today, I am thankful to them, and to the other senior members of the Al Shirawi and Valrani families, in entrusting me with the opportunity to shape the group going forward in a world that faces unprecedented challenges.

Amongst the many important lessons that I have learned from our founders, there is one that stands out for me as I take on the responsibility of Group Managing Director. Our founders often told me, “to do what I can to ensure that we remain ahead of our time.” It is this perspective that I wish to bring to every member of the Al Shirawi Group. Being the fortunate beneficiary of mentoring from two legendary individuals, it is now my duty to take this forward and spread their message across the group.

With the support of my board members, there will be a plan to work on the three key themes outlined by our Chairman: Unity, Hard Work and Innovation. The development of each one of these themes is critical in ensuring that we navigate successfully through whatever challenges the global economy presents us with. However, I am also convinced that when these three themes work in tandem, it will allow our organizations to build a competitive edge that is near impossible to replicate.

If we are to develop this edge, we need to build an organization that is continually learning. Learning to do good, learning to do better, and learning to be lifelong learners. In an age where there is a plethora of information available at our fingertips, our growth will be dependent upon not only what we learn but how we learn. As leaders, we therefore must do what we can to ensure that every member of our 10,000+ strong family is a more learned individual at the end of every working day than when the day started. If we are able to build a knowledge culture that achieves this, our competitive edge will exponentially strengthen.

There are indeed exciting times ahead for the Al Shirawi Group as we welcome the future with open arms.

VICE CHAIRMAN AND GROUP DEPUTY MANAGING DIRECTOR'S MESSAGE

Thani Al Shirawi

Vice Chairman and Group Deputy Managing Director

From a young age, I have been surrounded by inspirational leaders who have been my mentors, shaping the vision, direction, and future of the Al Shirawi Group. I consider myself extremely fortunate to have the founders as my mentors who instilled values of Integrity, Honesty, and Hard Work.

This laid the strong foundation of the Al Shirawi Group and has shaped my attitude towards our businesses. Over the years,

even through widespread economic disruptions, we have relied on these value driven lessons and decisions which have led us to achieve unparalleled economic and social performances. As a testament, we celebrated our 50th year of business in 2021.

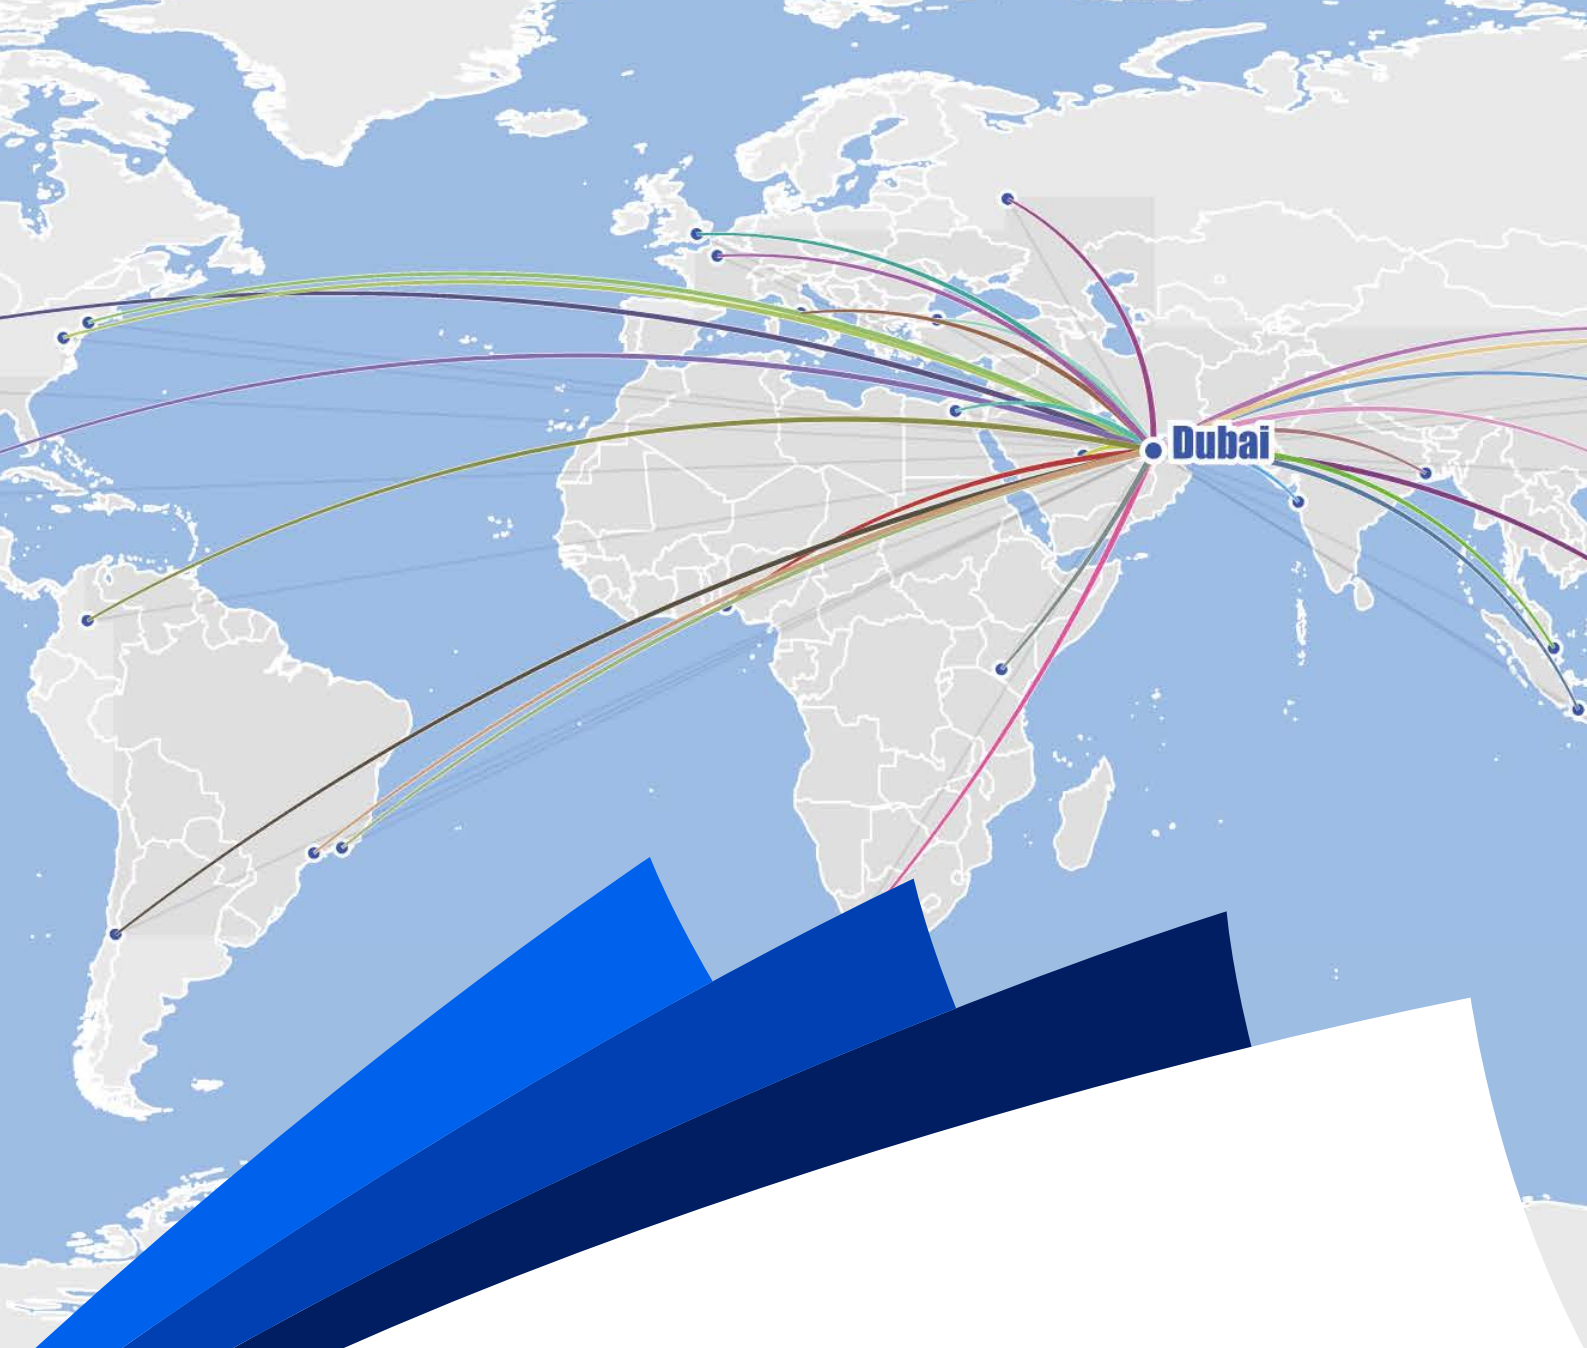

We aim to mirror the growth and progress that the UAE leaders have spearheaded, repeatedly reinvigorating our nation, and cementing the UAE as an innovation hub for development.

As the UAE equips itself to meet the ever-growing demands of a technology focussed and interconnected world, we at the Al Shirawi Group also revolutionize. As a group, we focus our collective efforts on exploring exciting prospects for the future. This is widespread across our 10,000+ strong employee base who know that the strength of our team is each individual member, and the strength of each member is the team.

I must emphasize the passion of our senior management and employees who continually transform, finding new ways of sustaining our business models. As a group we have developed a learning environment, utilizing the skills of our workforce and empowering them to grow, expanding their individual knowledge while building the joint knowledge of the group. Our work culture fosters dedicated, talented, problem- solvers focused on performance with teamwork and responsiveness. This has inspired us to take on opportunities, evolve our brands, and better communicate our expertise to truly represent our strengths.

The lessons I have learned through my own experiences, and from the mentorship I have received from Senior Members of the Al Shirawi and Valrani families, are to look beyond the present and to explore all avenues for new ventures.

I am honored to be entrusted to carry the torch for the Al Shirawi Group, celebrating our 50th year, as we look towards the next 50 years. I am confident that our collective efforts anchored in our value system will steer us towards a sustainable future for the group and each of our employees.

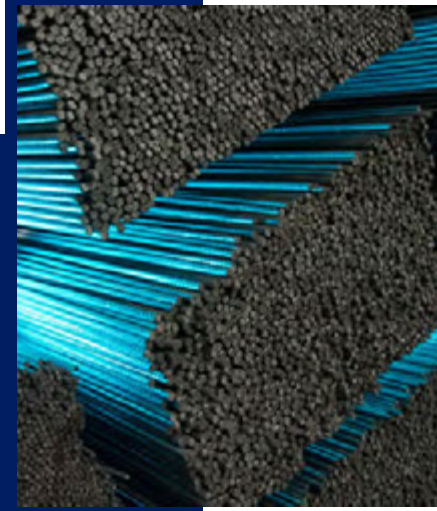

About Al Shirawi Group

Oasis Investment Company (OIC), the holding company of Al Shirawi Group, is a UAE-based conglomerate with over 30 different companies and 10,000 employees across the MENA region. Founded in 1971 by two visionary leaders, Abdulla Al Shirawi and Mohan Valrani, the Group has grown into one of the largest private business conglomerates in the UAE. With a reputation for reliability and service excellence, the Al Shirawi Group caters to a diverse set of global customers through its regional operations in industries such as Construction, Oil & Gas, Logistics, Heavy Equipment, HVAC, Printing & Packaging, Electronics, Manufacturing, Trading, Energy, Renewables, Water Solutions, Healthcare, and Education. The Al Shirawi Group today consists of multiple companies that have grown to become market leaders in their areas of expertise, with all companies united by a common vision: **"To Be Your Globally Trusted, Sustainable Growth Partner"**
